Allowable Subject Matter

1. Claims 64, 65 and 68-76 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

The Examiner indicated the features of claim 64 as allowable back when those features were contained in claims 46-48 and provided reasons for allowance in Paragraph 7 of the Office Action mailed 3/29/04.

The Examiner indicated claim 64 as allowable and provided reasons for allowance in Paragraph 5 of the Office Action mailed 8/25/05.

Claim 68 recites a microtitration plate comprised of a plastic based partially conductive material, a device for applying electric current to at least some part of the plastic material and a *capacitance measuring circuit adapted to be connected to the microplate via needle bed adapter*. The Examiner did not find prior art which teaches or suggests this combination of features.

3. Claim 76 recites a microtitration plate having memory locations/volumes and comprised of a plastic based partially conductive material, at least one capacitive

measuring sensor comprised of *capacitor plates made of the same material of which the microtitration plate is made*, and electrical circuits connected to the plate.

The Examiner considers the prior art Tagge and Eggers to be the closest prior art. Both Tagge and Eggers teach conductive materials for tempering specimen in the wells of microplates. They do not, however, teach devices having a needle bed adapter or capacitor plates comprised of the same material as the rest of the microtitration plate.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dwayne K. Handy whose telephone number is (571)-272-1259. The examiner can normally be reached on M-F 8:00-4:30.
